2022 ANNUAL MEETING OF STOCKHOLDERS

Stockholder Questions & Answers

Below are questions submitted during the 2022 Annual Meeting of Stockholders of Vishay held May 24, 2022.

The company may make forward-looking statements about our expectations or predictions about the future. Because these statements are based on current assumptions and factors that involve risks and uncertainties, the Company's actual performance and results may differ materially from what is said here today. Please refer to Vishay's Annual Report on Form 10-K and Form 10-Q filings for detailed discussions of principal risks and uncertainties that could cause such differences and to our subsequent SEC filings for updated.

Q. Dear Chair, the Carpenter Pension Funds as long-term owners appreciate the work of the Audit Committee to oversee the quality and independence of the audit work of Ernst & Young. The US SEC has proposed extensive new climate disclosures including in audited financial statements. If adopted, the disclosures will expand the oversight roles of audit committees generally, which raises a concern. As climate related disclosure takes the form of demanding regulatory requirements, how will the Audit Committee and Ernst & Young roles evolve to effectively handle these expanding responsibilities? Thank you.

A. from our Executive Chair of the Board, Marc Zandman Thank you for the question. The Company, its audit committee, and EY are all aware of the newly proposed regulations. At this point, the regulations are still just "proposed," and may possibly change before being adopted. We will monitor SEC rulemaking for further developments regarding the proposed rules, and will develop a roadmap to prepare for implementation when and as appropriate. Like all new disclosure and reporting obligations, we are confident that we will be able to put processes in place to be able to meet any new requirements when they become effective.
